

*Product Description*

MARKET USE:

Dark Red Kidney Bean

**CABERNET**

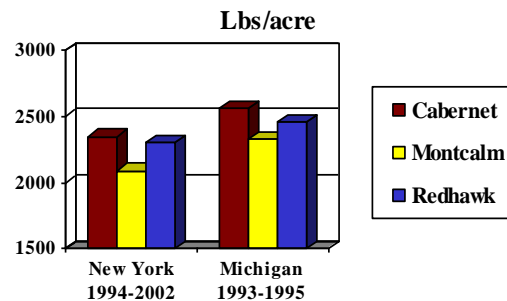

*Features*

- Mid-Season Dark Red Kidney
- High Quality Processed Product
- Good Yield Potential
- "I" Gene Resistance to BCMV

**CABERNET** has shown very high yield potential at a maturity 5-8 days earlier than that of Montcalm, with the addition of a slightly more erect plant. **Cabernet** tends to be more consistent than Drake and is better suited to dry-land production. Canned quality is excellent, offering an eye-catching finished product.

**YIELD TRIAL DATA \***

\*New York yield data courtesy of Cornell University.

\*Michigan yield data courtesy of the Michigan Dry Edible Bean Production Research Advisory Board.
