

Suggested Seeding Rates

	Row Spacing		
	9-15"	22"	30"
Navy Bean/Black Beans	140-150,000	120-130,000	100-110,000
Pinto	85-95,000	75-85,000	70-75,000
Kidney Beans	-	80-85,000	70-80,000
Cranberry	-	80-85,000	70-75,000
Small Reds / Pinks	95-100,00	80-85,000	75-80,000
Great Northerns	85-95,000	75-85,000	70-80,000

Treasure Valley Seed Co.

Seeding Tips

1. Plant seed after soil temps reach 52-55°F with a warm and frost free 10 day forecast.
2. Shallow planting of 1-1.5 inches is generally best, if seed is in moisture. 3 inch max depth.
3. If soil crust forms at emergence, it's advisable to rotary hoe or harrow to break crust.

Checking Plant Population

Row Width

6"

15"

22"

30"

Row Length for 1/1000 acre

87'1"

34'10"

23'9"

17'5"

Count number of plants in row length and multiply by 1000 to get population per acre.
